- **Systems & Tools:** SQL (Hogan), Python, Excel (VBA), Smartsheets, Julia, Web Development, Microsoft Ecosystem
- **Business Analysis:** Root Cause Analysis, User Stories & Acceptance Criteria, Backlog Management, Process Optimization
- **Data & Financial Analysis:** Quantitative Analysis, Dashboard Reporting Discrepancies, Compliance Reporting, Remediation Management
- **Collaboration & Leadership:** Stakeholder Management, Employee Training & Onboarding, Cross-Functional Communication

PROFESSIONAL EXPERIENCE

Operations Analyst | Equiniti — Minneapolis, MN

July 2024 – January 2025

- Managed digital asset processing and high-volume document ingestion pipelines for over 1,300 corporate client accounts.
- Collaborated with cross-functional teams and external stakeholders to validate and execute critical stock certificate modifications, including signature and corporate branding updates.
- Communicated key operational and system changes across stakeholders to maintain data integrity and regulatory standards.

Business Systems Analyst | General Mills — Minneapolis, MN

February 2023 – November 2023

- Conducted in-depth root-cause analysis on complex reporting discrepancies within user dashboards, improving overall data accuracy.
- Gathered business requirements and authored actionable user stories with explicit acceptance criteria to guide system enhancements.
- Leveraged Advanced Excel and Smartsheets to analyze business datasets, optimize project management toolkits, and refine KPI reporting metrics.
- Managed backlog priorities and aligned product features with business goals in direct collaboration with project stakeholders.

Business Systems Analyst | Wells Fargo — Minneapolis, MN

January 2020 – February 2023

- Queried and navigated enterprise financial systems (Hogan, SQL) to extract, analyze, and reconcile transaction data across debit card, ATM, and electronic fund transfers.
- Resolved complex data and system reporting disputes, ensuring alignment with strict Service Level Agreements (SLAs).
- Managed end-to-end data delivery and operational resolution for consumer remediation initiatives.
- Audited financial datasets to extract operational metrics required for government compliance and regulatory reporting.
- Designed and launched 5+ comprehensive technical training modules; facilitated weekly training sessions for up to 50 employees and new hires.

EDUCATION

B.A. in Mathematics | University of Minnesota (2019)
